Challenge: Commercial carpet cleaning in high traffic environments

Solution 1: Prime Source Renew Heavy Duty Extraction Cleaner

Low foaming extraction (steam cleaning) type product is ideal for use on stain-resistant carpeting. The fresh citrus scent formula contains optical brighteners and soil retardants, and is designed for cleaning large areas quickly and efficiently without leaving a soap residue. The safe, water-based formula is safe to use on all colorfast carpets, rugs, and fabrics.

Solution 2: Prime Source Spin-Off Bonnet & Traffic Lane Cleaner

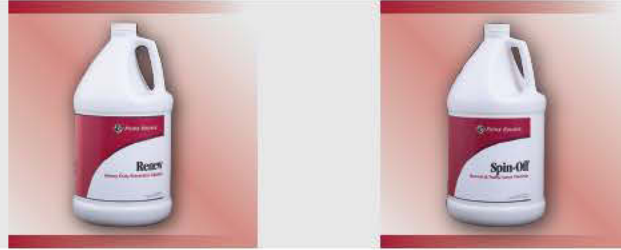

Interim carpet maintenance of high traffic lanes helps keep high profile areas looking presentable and extends carpet life. Use this concentrate with a floor machine in bonnet cleaning carpet care applications. Neutral pH base makes this safe for 5th generation carpeting. Product dries rapidly leaving a clean, fresh scent so that cleaned area may be quickly reopened to traffic with little downtime.
